

EXTENSION® Mobile is a feature of the EXTENSION Solution Suite that enables healthcare professionals to receive alerts and notifications on their preferred smartphone or tablet via a mobile application installed on their device. The user-friendly applications allow physicians, nurses and other clinical staff members to stay connected to each other and patients from any location. The EXTENSION Mobile solution advances patient care by allowing caregivers to effortlessly send and receive critical alerts and other notifications on their Apple® iPhone®, iPod touch®, or Android™ device. Automated communication among stakeholders providing treatment is integral to improved patient outcomes and overall patient and staff satisfaction. Clinicians stay connected with EXTENSION Mobile.

Nurse Call Integration

Sends data from HIS/EHR systems to an Apple iPhone/iPod touch or Android operating device.

Critical Lab Result Notification

Sends LIS data to Apple iPhone/iPod touch or Android operating device.

Meeting Healthcare Objectives

Greater Patient Care

Improve the patient experience and clinical outcomes by enhancing communication among patients and clinical staff.

Secure Communication

Communication solutions are encrypted, fully logged, auditable and require authentication.

Improve Patient Throughput & Revenue

Improve clinical workflows and staff efficiencies to reduce overall costs.

Reduce Overhead Noise

Eliminate disruptive noises in the healing environment, decrease alarm fatigue, reduce the length of time a patient stays and improve the quality of care.

Greater Patient Satisfaction & Scores

Patients can easily communicate with clinical staff and receive timely attention in a quiet healing environment.

Improve Staff Satisfaction

Advanced communication solutions that are easy-to-use, require little training and dramatically improve clinical and operational workflows.

Increase Nurse / Patient Face Time

Clinicians receive alerts and notifications directly on their preferred mobile device whenever, wherever.

Align With Business Objectives

Improve patient care, reduce clinical errors and costs, communicate quickly, and improve patient and staff satisfaction.

Healthcare. Whenever. Wherever.

In order to view a demo of HealthAlert™ *for Nurses* or HealthAlert™ *for Physicians* on your mobile device, please download the EXTENSION Mobile app from the respective app store, start the app, and follow the instructions. If you would like to view a demo of both HealthAlert *for Nurses* and HealthAlert *for Physicians* please let us know and we will provide further instructions. Email us as information@ext-inc.com.
